@derickbailey I don't waste time and I don't have to hunt and maintain 100 plugins. I like an IDE and I've used lighter editors, IDE wins

@derickbailey I'd argue not much, most good IDEs are really just frontend to command line processes. Even Visual Studio.

@derickbailey I don't want any of the IDE features nearly as much as I want a good pairing experience like tmux/vim.
